

NW Cyber Camp Helps Train Tomorrow's Cybersecurity Experts; \$21,250 in Scholarships for Public Key Infrastructure Training to be Awarded

PORTLAND, Ore., June 15, 2019 — Cybersecurity is one of today's fastest growing careers given the significant increase in cyber attacks and data breaches across the country. [NW Cyber Camp](#), a week-long cybersecurity summer camp, and its supporters, including title sponsor [PacStar](#), are making an impact on high school students throughout Oregon by introducing them to cybersecurity with a hands-on immersive camp. NW Cyber Camp 2019, to be held July 15 through July 19, will provide valuable cybersecurity training to students and teach them how to defend computer systems and networks from cyber attacks, breaches, and malware. A new Advanced Cybersecurity Camp will be held July 22 through July 26 for students who want to continue their cybersecurity training after attending NW Cyber Camp.

"Given the extreme need for more cybersecurity professionals in the workforce, it's imperative that we start training the next generation of cybersecurity experts by providing the kind of hands-on, immersive learning experiences that will get students excited about technology," said Steve Parker, president of [EnergySec](#), the new organizer of the camp. "We're also very excited to offer an Advanced Cybersecurity Camp for the first time so we can reach more students."

Now in its fourth year, NW Cyber Camp, will feature leading industry professionals and cybersecurity educators who will share cybersecurity techniques to help students gain confidence, learn valuable skills, and prepare them for a future career in technology. Industry experts from [Aruba](#), [Facebook](#), [Galois](#), [Iovation](#), [McAfee](#), PacStar, [PKI Solutions](#), [Splunk](#), and other companies will be speaking at the camp. The girls-only camp session will feature women instructors and guest speakers. Register now at <https://www.nwcyber.camp/register/>

Select Students to be Awarded \$4,250 Scholarships for In-Depth PKI Training

To support and fuel students' interest in cybersecurity, PKI Solutions Inc., a sponsor of NW Cyber Camp again this year, will award five scholarships for an online in-depth Public Key Infrastructure (PKI) training course (each course valued at \$4,250), to students selected from this year's NW Cyber Camp. The scholarships will pay for motivated students to attend an intensive Microsoft PKI online training course, provided by Mark B. Cooper, known as "The PKI Guy," a leading expert in this field. The course has a strong emphasis on security, best practices, and hands-on skills labs.

"We are very pleased to expand the number of special scholarships to be awarded this year to NW Cyber Camp students. These awards will allow motivated students to learn more about PKI and the best ways to make computer systems more secure," said Mark B. Cooper, president and founder of PKI Solutions. "It's an exciting time for these student as they are on the cusp of determining their possible future careers. Cybersecurity is one of the hottest and most in-demand career paths right now."

NW Cyber Camp 2019 Details

- Co-Ed, Center for Advanced Learning, 1484 NW Civic Drive., Gresham, OR 97030
- Co-Ed, Mentor Graphics, 8005 Boeckman Road, Wilsonville, OR 97070
- Co-Ed, Oregon State University, Corvallis, OR 97330
- Girls Camp, Oregon State University – Portland location, 621 SW 5th Ave, Portland, OR 97204
- Advanced Camp, Co-Ed, Center for Advanced Learning, 1484 NW Civic Drive., Gresham, OR 97030

Students who have already attended NW Cyber Camp may attend a new co-ed Advanced Cybersecurity Camp to be held July 22-26 at the Center for Advanced learning in Gresham.

NW Cyber Camp 2019 is made possible by several leading companies including Title Sponsor PacStar. Platinum Plus Sponsors include Aruba, Facebook, [HPE](#), and McAfee. Platinum Sponsors include [FireEye](#), Galois, [IBM](#), Iovation, [ISACA](#), [Mentor Graphics](#), PKI Solutions, and [Umpqua Bank](#). Gold Sponsors are [Fidelis Cybersecurity](#), and Splunk. In-kind sponsors include EnergySec, [HP](#), [Oregon State University](#), and the [Technology Association of Oregon](#).
